**Note**

Test size is a critical factor in determining compliance with Agency's window performance specification (MHFA 08630-01). If the size of window product selected for a particular development exceeds the AAMA/NWWDA Residential Gateway test size used in determining compliance with the Agency's specification, a larger specimen size must be tested for compliance. It is the responsibility of the Owner or Owner's designated Agent to verify that all windows used on a particular project meet the Agency's requirements.
